EDUCATION

WILFRID LAURIER UNIVERSITY, LAZARIDIS SCHOOL OF BUSINESS & ECONOMICS

Honours Bachelor of Science in Computer Science & Honours Bachelor of Business Administration

Waterloo, ON

Expected Graduation 2027

Awards & Certificates: \$3000 Entrance Scholarship, 3rd Place - LCPG x LFC Case Competition (2022)

EXPERIENCE

Milano Computers

Founder

Toronto, ON

September 2018- Present

- Assembled, upgraded, and repaired over 50+ custom PCs, consulting directly with clients to optimize hardware configurations based on specific performance needs and budget constraints
- Benchmarked CPU and GPU performance across AMD Ryzen/Radeon, Intel Core, and NVIDIA GeForce hardware using 3DMark, Cinebench, and MSI Afterburner, testing multi-core rendering and 1080p-4K DirectX 12/Vulkan workloads to identify bottlenecks, thermal limits, and driver regressions
- Translated complex benchmark scores and thermal metrics into accessible, client-facing performance reports, using empirical data to validate hardware choices, demonstrate value, and successfully sell custom builds

Sun Life Financial

Digital Transformation Analyst

Toronto, ON

September 2025 - December 2025

- Implemented point-in-time reporting logic across Sun Life's 5 largest Power BI dashboards, enabling leaders to analyze historical data states and improving accuracy for trend analysis, forecasting, and audit reporting
- Refactored Power BI data models and queries, reducing dashboard refresh times from 6 hours to 3 minutes and shrinking file sizes from 320MB to 67MB, significantly improving dashboard performance and accessibility for business users
- Placed Top 3 in the Sun Life Student Innovation Challenge, pitching an AI agent solution for enterprise workflows, recognized for its technical depth, scalability, and business applicability

PepsiCo

IT Analyst

Toronto, ON

January 2025 - April 2025

- Built the "Interzone Act vs PSA" analytics dashboard using Power BI and SharePoint, enabling real-time monitoring of out-of-zone shipments and identifying cost inefficiencies that drove \$680K+ in annual logistics savings
- Automated PO approval tracking through a SharePoint-integrated notification system, reducing approval response times by 30% during pilot testing and minimizing procurement processing delays
- Developed an Audit Scheduling Tool using Power Apps and Power Automate that centralized scheduling for 100+ operational audits, improving planning visibility and reducing manual coordination across operational teams

Konfer Inc

Founder & Chief Strategy Officer

Waterloo, ON

July 2024 - August 2025

- Led strategic partnerships in collaboration with Spur Innovation to support 20+ AI-driven startups through mentorship, investment consultation, and go-to-market strategy within the Waterloo startup ecosystem
- Organized SpurHacks, a 1,400+ participant hackathon with \$100,000+ in prizes, connecting students, founders, and investors while creating a pipeline for high-potential startup projects
- Directed corporate and startup outreach to host 10+ networking and innovation events, connecting 200+ founders, investors, and industry professionals to facilitate partnerships and ecosystem collaboration

EXTRACURRICULARS

Laurier Computing Society

President

Waterloo, ON

August 2024 - Present

- Direct a 52-member executive team across 7 departments in a highly fast-paced environment, utilizing strong interpersonal and multitasking skills to grow one of Canada's largest university computer science societies serving 4,000+ students.
- Organize 26+ annual events, including technical workshops with partners such as IBM and industry speaker panels featuring 12+ professionals from leading tech companies, connecting students with career and networking opportunities
- Led a 4-month cross-team project with LCS Engineering to develop an interview management platform enabling Laurier student clubs to host and coordinate recruitment interviews

TECHNICAL SKILLS

Tools: Power BI, Windows OS Imaging (Sysprep/DISM), Power Automate, Excel, GitHub, Zapier, Jira, Notion, Canva, Figma

Languages: C++, Python, HTML, XML, Java, C, JavaScript, CSS, VBA, COBOL

Interests: Competitive gaming (Previous World Record Holder in Call of Duty Zombies), collecting retro video games & consoles

AMD

1 Commerce Valley Drive East

Markham, ON L3T 7X6

RE: Technical Marketing – Performance Analysis Co-op (Fall 2026)

Dear Hiring Team,

I am writing to apply for the Technical Marketing – Performance Analysis Coop at AMD. As a student pursuing a Computer Science and Business Administration double degree at Wilfrid Laurier University, I love operating at the intersection of technical hardware and data-driven strategy. AMD's continuous push in GPU architecture, from RDNA 3 to the Radeon RX 9000 series, and its commitment to open technologies like FSR are exactly why I am so passionate about PC hardware and competitive gaming.

Through my business, Milano Computers, I have built, upgraded, and troubleshooted over 50 custom PCs. This hands-on experience means I have spent years running systematic performance evaluations across both AMD Radeon and NVIDIA GeForce product lines. I routinely use 3DMark, Cinebench, and MSI Afterburner to push components to their limits at 1080p, 1440p, and 4K under DirectX 12 and Vulkan workloads. More importantly, I know how to make sense of those results, whether that involves tracking thermal limits, spotting driver regressions, or comparing AMD FSR against NVIDIA DLSS in titles like Cyberpunk 2077 and Hogwarts Legacy to help my clients make informed purchasing decisions.

I know that generating benchmark data is only half the battle, visualizing it effectively is just as critical. At Sun Life Financial, I refactored enterprise Power BI models to cut dashboard refresh times from 6 hours to just 3 minutes and took the lead on creating dashboards for business leaders. Similarly, at PepsiCo, I built real-time analytics dashboards that identified logistics inefficiencies and drove over \$680K in annual savings. I am ready to bring this same analytical rigor to translating raw benchmark data into actionable reviewer guides and clear release notes for your team.

To keep my workflows efficient, I actively use C++ and Python to write scripts that parse structured data and automate repetitive file operations. These skills translate directly to developing the automated test-launch scripts, error-handling routines, and result parsers your team relies on. I am also highly comfortable using XML, HTML, and Excel to organize, chart, and present large performance datasets.

Finally, I know how to manage fast-paced projects and communicate effectively across teams. As President of the Laurier Computing Society, I direct a 52-member executive team to deliver complex initiatives under tight deadlines. But beyond the technical and leadership skills, I am genuinely the end-user AMD builds for. As a former world record holder in Call of Duty: Black Ops III Zombies, I understand firsthand exactly how frame rate consistency, driver stability, and image quality make or break the gaming experience.

I would love the opportunity to bring my hands-on hardware expertise and analytical background to the AMD Radeon team this fall. Thank you for your time and consideration.

Sincerely,

Vincenzo Milano
